CONTENTS

Volume 70 (1990)

PHYSIOLOGY AND BIOCHEMISTRY

Fructose-1,6-bisphosphate and calcium activate oxidized spinach (*Spinacia oleracea*) chloroplast fructose-1,6-bisphosphatase
by T. Chardot and J.-C. Meunier (Thiverval-Grigon, France) 1–9

Biochemical markers of female receptivity in maize (*Zea mays* L.) assessed using in vitro fertilization
by I. Dupuis and C. Dumas (Villeurbanne, France) 11–19

Differential effects of ammonium and tungsten on nitrate and nitrite uptake and reduction by sunflower plants
by P. de la Haba, E. Agüera and J.M. Maldonado (Córdoba, Spain) 21–26

Inhibition of energy transfer from light harvesting chlorophyll-protein complex to photosystem II by oxyfluorfen
by D. Sharma, R. Bhardwaj and V. Maheshwari (Indore, India) 27–33

Effect of alkaline pH on the activity and the structure of chloroplast fructose-1,6-bisphosphatase
by M.A. Ballicora and R.A. Wolosiuk (Buenos Aires, Argentina) 35–41

Regulation of proline accumulation in detatched rice leaves
by I.T. Chou, C.T. Chen and C.H. Kao (Taiwan, Republic of China) 43–48

Characterization of the flavonol glycosides in *Petunia*
by R.J. Griesbach and S. Asen (Beltsville, MD) 49–56

The relationship between mature chains and their precursors of cruciferin, the 12S storage protein of *Brassica napus*
by J. Rödin and L. Rask (Uppsala, Sweden) 57–63

Cytokinin translocation and metabolism in lupin species. III. Translocation of xylem cytokinin into the seeds of lateral shoots of *Lupinus angustifolius*
by R. Zhang and D.S. Letham (Canberra, Australia) 65–71

GENETICS AND MOLECULAR BIOLOGY

Rice seed storage proteins: a structural insight
by Y.R. Mawal, M.R. Mawal, M.N. Sainani and P.K. Ranjekar (Poona, India) 73–80

Biochemical genetics of the interaction of the lysine plus threonine resistant mutant *Ltr*1* with opaque-2 maize mutant
by R.A. Azevedo, J.L. Arana and P. Arruda (Campinas, Brazil and Rosario, Argentina) 81–90

CELL AND TISSUE STUDIES IN VITRO

Transformation of *Brassica napus* L. (oilseed rape) using *Agrobacterium tumefaciens* and *Agrobacterium rhizogenes* — a comparison
by M.E. Boulter, E. Croy, P. Simpson, R. Shields, R.R.D. Croy and A.H. Shirsat (Durham and Cambridge, U.K.) 91–99

Plant regeneration from protoplasts of immature cotyledons of *Glycine soja* Sieb. et Zucc.
by Z.M. Wei and Z.H. Xu (Shanghai, People's Republic of China) 101–104

Introduction of resistance to kanamycin into the protoplasts from a pantothenate-requiring auxotrophic cell line of *Datura innoxia* P. Mill via direct gene transfer
by P.K. Saxena, J. Hammerlindl, W.L. Crosby and J. King (Saskatoon, Canada) 105–114

Plant regeneration from cell culture-derived protoplasts of statice (*Limonium perezii* Hubbard)
by H. Kunitake and M. Mii (Chiba, Japan) 111–119

Characterization of pea shoots miniaturized by growth in culture
by K.S. Gould and S.R.P. Chambers (Auckland, New Zealand) 121–127

GENERAL

Changes in endogenous abscisic acid of plants exposed to nitrogen dioxide
by G.C. Gupta and R.K. Sandhu (Princess Ann, MD) 129–132

An improved assay for β-glucuronidase in transformed cells: methanol almost completely suppresses a putative endogenous β-glucuronidase activity
by S. Kosugi, Y. Ohashi, K. Nakajima and Y. Arai (Tsukuba, Japan) 133–140

PHYSIOLOGY AND BIOCHEMISTRY

Effect of lysophosphatidylcholine on the NADH-ferricyanide reductase activity associated with the plasma membranes of corn roots
by I. Bourdil, M.-L. Milat and J.P. Blein (Dijon, France) 143–153

Changes in glutathione and phytochelatins in roots of maize seedlings exposed to cadmium
by A. Tukendorf and W.E. Rauser (Lublin, Poland; Guelph, Canada) 155–166

Differential effects of light and fungal elicitor on chlorogenic acid and caffeoylshikimic acid metabolism
by U. Koch, T. Kühnl, W. Conradt and E. Wellmann (Freiburg, F.R.G.) 167–174

Oxidation of [1-^{14}C]linoleic acid in isolated microsomes from pea leaves
by A.N. Grechkin, N.V. Kukhtina, T.E. Gafarova and R.A. Kuramshin (Kazin, U.S.S.R.) 175–180

GENETICS AND MOLECULAR BIOLOGY

DNA uptake during electroporation of germinating pollen grains
by A.A. Abdul-Baki, J.A. Saunders, B.F. Matthews and G.W. Pittarelli (Beltsville, MD) 181–190

CELL AND TISSUE STUDIES IN VITRO

Use of culture filtrates of *Ceratocystis ulmi* as a bioassay to screen for disease tolerant *Ulmus americana*
by P.M. Pijut, S.C. Domir, R.D. Lineberger and L.R. Schreiber (Columbus and Delaware, OH) 191–196

Selection and characterization of somatic hybrids between *Lycopersicon esculentum* and *Lycopersicon peruvianum*
by J. Wijbrandi, W. Van Capelle, C.J. Hanhart, E.P. Van Loenen Martinet-Schuringa and M. Koornneef (Wageningen, The Netherlands) 197–208

Effect of auxin concentration and growth phase on the plasma membrane H^+-ATPase of tobacco calli
by T. Altabella, J. Palazon, E. Ibarz, M.T. Piñol and R. Serrano (Barcelona, Spain; Heidelberg, F.R.G.) 209–214

Plant regeneration from mesophyll protoplasts of *Solanum commersonii* Dun.
by T. Cardi, K.J. Puite and K.S. Ramulu (Portici, Italy; Wageningen, The Netherlands) 215–221

In vitro capsaicin production by immobilized cells and placental tissues of *Capsicum annuum* L. grown in liquid medium
by T.S. Johnson, G.A. Ravishankar and L.V. Venkataraman (Mysore, India) 223–229

The induction of Linocomycin resistance in *Lycopersicon peruvianum* and *Lycopersicon esculentum*
by C. Glas, J.C. Kamp, C. Jongsma, H.J.J. Nijkamp and J. Hille (Amsterdam, The Netherlands) 231–241

GENERAL

Characterization of transgenic root cultures of *Trifolium repens*, *Trifolium pratense* and *Lotus corniculatus* and transgenic plants of *Lotus corniculatus*
by K.J Webb, S. Jones, M.P. Robbins and F.R. Minchin (Aberystwyth, U.K.) 243–254

Nuclear DNA content and separation of *Nicotiana sylvestris* vegetative and generative nuclei at various stages of male gametogenesis
by R. De Paepe, A. Koulou, J.L. Pham and S.C. Brown (Gif-sur-Yvette, France) 255–265

Subject Index Volume 70 267–270
